

### **Module 2: Capacity Building Strategies for "Connecting and Convening Partners"**

The focus of this module is to expand the capacity of public health practitioners to enhance and build new connections and partnerships to promote healthy aging. After completing these sections, public health practitioners should be able to identify partners and/or existing coalitions and networks that could help to leverage the development and adoption of age-friendly policies and programs, including a statewide AFPHS action or work plan.

**Definition:** Connecting and convening multi-sector partners to address the health and social challenges of older adults through collective impact could take many forms, including coalitions to advance healthy aging, educating partners about the value of age-friendly programs and services, and engaging with partners to advance a Multi-sector Plan for Aging.

#### **Module 2 Learning Objectives:**

- 1. Define "Connecting and Convening"
- 2. Identify at least three strategies that demonstrate "Connecting and Convening"
- 3. Identify opportunities to collaborate with staff across multiple sectors and agencies to adopt and implement age-friendly policies and systems changes
- 4. Explain how to advance health equity within healthy aging practices by addressing the social determinants of health
- 5. Identify challenges to and solutions for public health adoption and implementation of healthy aging policies and systems changes

## **Policy and Practice Strategies**

The strategies listed below have been compiled based on current activities of state, local, tribal, and territorial health departments that are building age-friendly public health systems. Some are very practical and may be easier to adopt and implement (Tier One) and some will be more challenging, requiring more time, resources, and potentially, funding (Tier Two). No policy or practice changes is too large or small for consideration and should be approached in the context of department leadership, existing partnerships, and appetite for change.

The steps below are intended to guide exploration of healthy aging with a view toward full adoption of healthy aging as a core public health function. Practitioners are encouraged to consider additional strategies based on the healthy aging work already underway, the structure of the public health agency, and the unique needs of older adults and caregivers in their own jurisdictions.

#### Steps:

- 1. Identify 2-3 strategies to explore.
- 2. Answer all questions and identify the next steps for that strategy. If working with a committee, discuss the feasibility of the strategies.
- 3. Select the tools and resources you can use to better understand how to move toward completion of that strategy.
- 4. Identify other healthy aging strategies that are achievable and sustainable within this tenet.

	considered to include in this alliance?			

# **Strategies to Address Barriers and Opportunities**

Through strategic engagement with multi-sector partners, public health professionals are well positioned to connect and convene partners to promote older adult health and well-being within jurisdictions. Public health professionals can also assess whether any barriers exist within their jurisdiction that may prevent them from enacting systemic change. Specific actions are listed here that they can take to address barriers in their efforts to connect and convene.

#### Steps:

- 1. Identify any challenges you may face in your efforts to advance healthy aging and the selected strategy.
- 2. Answer all questions and identify the next steps for that strategy.
- 3. Select the tools and resources you can use to better understand how to move toward completion of this strategy.
- 4. Identify other healthy aging strategies that are achievable and sustainable within this tenet.

Strategies	Questions to Consider	Resources to Explore	Selected Strategies
Review the funding opportunities that may exist to support collaborative efforts.	-In what ways can the abundance of resources or the lack of resources make the case needed to convene and connect partners? -What funding flexibilities might exist to support advancing a selected strategy?	<ul> <li>♦ Grants.gov</li> <li>♦ Grantmakers in Aging</li> <li>♦ State/municipal funding</li> <li>♦ Jurisdiction or regional philanthropies</li> </ul>
