

Age-Friendly Ecosystem State Snapshot

Creating the conditions for all people to age healthfully, independently, and productively requires collaboration across multiple sectors. State and community partnerships focused on these goals comprise an Age-Friendly Ecosystem, a network of practitioners, providers, and organizations from across sectors that prioritize improved quality of life for older adults, their families, caregivers, and communities through collaborative effort and impact.

Age-Friendly Ecosystem Sector Descriptions	
Age-Friendly Public Health Systems	An Age-Friendly Public Health System elevates healthy aging as core function of public health practice, using the AFPHS 6Cs framework to guide policy and systems changes that support older adult health and well-being at state, local, territorial, and tribal levels.
Age-Friendly Health Systems	The goal of the Age-Friendly Health Systems movement is to embed the 4Ms of age-friendly care (What Matters, Medication, Mentation, and Mobility) as the equitable standard of care for all older adults in partnership with their family caregivers.
Age-Friendly States, Counties, Cities & Communities	AARP Age-Friendly States, Counties, Cities and Communities engage state and local governments, community partners, and residents in a shared commitment to take actions that strengthen the built and social environments for older adults and people of all ages.
Age-Friendly Universities	Members of the Age-Friendly University Global Network promote institutional change in higher education by embedding age inclusivity, advancing lifelong learning pathways, and strengthening partnerships that support individuals and communities throughout the life course.
Age-Friendly Workplaces	An age-friendly workplace is one that provides flexible work arrangements, training and development for older workers, addresses age bias and multi-generational engagement, and focuses on age diversity and inclusion.
Aging Services Network	The aging services network provides the crucial services and connections for older adults and people with disabilities including food, transportation, caregivers supports, legal assistance, and care transitions that enables them to live independently and socially engaged.

Age-Friendly Communities

Age-Friendly Ecosystem State Snapshot

Creating the conditions for all people to age healthfully, independently, and productively requires collaboration across multiple sectors. State and community partnerships focused on these goals comprise an Age-Friendly Ecosystem, a network of practitioners, providers, and organizations from across sectors that prioritize improved quality of life for older adults, their families, caregivers, and communities through collaborative effort and impact.

Characteristics of an Age-Friendly Ecosystem

Age-Friendly Ecosystem Sector Descriptions	
Age-Friendly Public Health Systems	An Age-Friendly Public Health System elevates healthy aging as core function of public health practice, using the AFPHS 6Cs framework to guide policy and systems changes that support older adult health and well-being at state, local, territorial, and tribal levels.
Age-Friendly Health Systems	The goal of the Age-Friendly Health Systems movement is to embed the 4Ms of age-friendly care (What Matters, Medication, Mentation, and Mobility) as the equitable standard of care for all older adults in partnership with their family caregivers.
Age-Friendly States, Counties, Cities & Communities	AARP Age-Friendly States, Counties, Cities and Communities engage state and local governments, community partners, and residents in a shared commitment to take actions that strengthen the built and social environments for older adults and people of all ages.
Age-Friendly Universities	Members of the Age-Friendly University Global Network promote institutional change in higher education by embedding age inclusivity, advancing lifelong learning pathways, and strengthening partnerships that support individuals and communities throughout the life course.
Age-Friendly Workplaces	An age-friendly workplace is one that provides flexible work arrangements, training and development for older workers, addresses age bias and multi-generational engagement, and focuses on age diversity and inclusion.
Aging Services Network	The aging services network provides the crucial services and connections for older adults and people with disabilities including food, transportation, caregivers supports, legal assistance, and care transitions that enables them to live independently and socially engaged.

Age-Friendly Communities

Age-Friendly Ecosystem State Snapshot

Creating the conditions for all people to age healthfully, independently, and productively requires collaboration across multiple sectors. State and community partnerships focused on these goals comprise an Age-Friendly Ecosystem, a network of practitioners, providers, and organizations from across sectors that prioritize improved quality of life for older adults, their families, caregivers, and communities through collaborative effort and impact.

Age-Friendly Ecosystem Sector Descriptions	
Age-Friendly Public Health Systems	An Age-Friendly Public Health System elevates healthy aging as core function of public health practice, using the AFPHS 6Cs framework to guide policy and systems changes that support older adult health and well-being at state, local, territorial, and tribal levels.
Age-Friendly Health Systems	The goal of the Age-Friendly Health Systems movement is to embed the 4Ms of age-friendly care (What Matters, Medication, Mentation, and Mobility) as the equitable standard of care for all older adults in partnership with their family caregivers.
Age-Friendly States, Counties, Cities & Communities	AARP Age-Friendly States, Counties, Cities and Communities engage state and local governments, community partners, and residents in a shared commitment to take actions that strengthen the built and social environments for older adults and people of all ages.
Age-Friendly Universities	Members of the Age-Friendly University Global Network promote institutional change in higher education by embedding age inclusivity, advancing lifelong learning pathways, and strengthening partnerships that support individuals and communities throughout the life course.
Age-Friendly Workplaces	An age-friendly workplace is one that provides flexible work arrangements, training and development for older workers, addresses age bias and multi-generational engagement, and focuses on age diversity and inclusion.
Aging Services Network	The aging services network provides the crucial services and connections for older adults and people with disabilities including food, transportation, caregivers supports, legal assistance, and care transitions that enables them to live independently and socially engaged.

Age-Friendly Communities

Age-Friendly Ecosystem State Snapshot

Creating the conditions for all people to age healthfully, independently, and productively requires collaboration across multiple sectors. State and community partnerships focused on these goals comprise an Age-Friendly Ecosystem, a network of practitioners, providers, and organizations from across sectors that prioritize improved quality of life for older adults, their families, caregivers, and communities through collaborative effort and impact.

Age-Friendly Ecosystem Sector Descriptions	
Age-Friendly Public Health Systems	An Age-Friendly Public Health System elevates healthy aging as core function of public health practice, using the AFPHS 6Cs framework to guide policy and systems changes that support older adult health and well-being at state, local, territorial, and tribal levels.
Age-Friendly Health Systems	The goal of the Age-Friendly Health Systems movement is to embed the 4Ms of age-friendly care (What Matters, Medication, Mentation, and Mobility) as the equitable standard of care for all older adults in partnership with their family caregivers.
Age-Friendly States, Counties, Cities & Communities	AARP Age-Friendly States, Counties, Cities and Communities engage state and local governments, community partners, and residents in a shared commitment to take actions that strengthen the built and social environments for older adults and people of all ages.
Age-Friendly Universities	Members of the Age-Friendly University Global Network promote institutional change in higher education by embedding age inclusivity, advancing lifelong learning pathways, and strengthening partnerships that support individuals and communities throughout the life course.
Age-Friendly Workplaces	An age-friendly workplace is one that provides flexible work arrangements, training and development for older workers, addresses age bias and multi-generational engagement, and focuses on age diversity and inclusion.
Aging Services Network	The aging services network provides the crucial services and connections for older adults and people with disabilities including food, transportation, caregivers supports, legal assistance, and care transitions that enables them to live independently and socially engaged.
